Graph Theory

Exam Requirements

Your grade will be determined by the 2-hour written exam given on March 4th, 9-11AM in Room E5 of the Main Building. If you are not able to come to the exam, let me know beforehand. We will arrange a make-up exam in September.

Material. Everything presented in lecture and the exercises. You can find the transparencies, homework exercises and solutions on the web-page of the course. (`http://www.ti.inf.ethz.ch/ew/courses/GT02/index.html`)

Exam. You will be given 6 exercises similar to the ones on the Homework sheets. Two of the hardest ones will actually be past homework exercises. To receive a passing grade you need to solve at least two problems completely. You are only allowed to use a "cheat sheet", one side of an A4 paper, on which you can write anything. (No books, notes, laptops, etc...)

Study for the exam. You should be able to solve the past homework exercises. As a practice, try to work on other exercises from the book, as many as you can. Concentrate on the ones with (-) and (!). Make sure you understand all the definitions and theorems. In an ideal case you would understand all the proofs as well. The ideas of these proofs are often utilized elsewhere.

Help. I am here except for one week (from the 17th of Feb). You are welcome to write questions in e-mail (`szabo@inf.ethz.ch`) or ask them in person. To make sure I am in my office, write me e-mail, but you could also just try your luck and stop by (Room 48.1 Building IFW).
