## INFORMATIK

für Mathematiker und Physiker
Eine Einführung in C++
Skript zur Vorlesung 251-0847-00
Herbstsemester 2007, ETH Zürich ${ }^{1}$

## Bernd Gärtner

Michael Hoffmann

## Contents

Contents ..... -1
1 Introduction5
6
1.1 Why learn programming? ..... r
1.2 How to run a program
1.2 How to run a program ..... 11
1.2.1 Editor11
11
1.2.2 Compiler ..... 13
1.2.4 Operating system ..... 14
1.2.5 Platform ..... 14
1.2.6 Details ..... 15
2 Foundations ..... 17
2.1 A first C++ program ..... 18
19
2.1.1 Syntax and semantics.19
20
21
.1.2 Comments and layout
1.1.3 Include directives21
22
.1.4 The main functio22
23
23
2.1.6 Types and functionality23
23
2.1.7 Literals
23
23
.1.8 Variables
24
24
2.1.9 Identifiers and names ..... 24
2.1.11 Expressi ..... 25
26
2.1.12 Lvalues and rvalues ..... 26
26
2.1.13 Operators ..... 26
29
2.1.14 Statements ..... 29
.1.15 Details$\begin{array}{r}31 \\ 34 \\ \hline\end{array}$
.1.16 Goals
34
35
.1.17 Exercises ..... 35
37
2.2 Integers37
2.2.1 Associativity and precedence of operator38
2.2.2 Expression trees40
2.2.3 Evaluating expressions ..... 40
2.4 Arithmetic operators on the type int ..... 41
45
Value range
46
2.2.6 The type unsigned int ..... 47
2.2.8 Binary representation ..... 48
2.2.9 Integral types ..... 50
2.2.10 Details ..... 51
55
2.2.11 Goals55
56
57
.2.12 Exercises ..... 57
59
2.3 Booleans ..... 59
2.3.1 Boolean function ..... 59
2.3.2 The type bool
64
2.3.3 Short circuit evaluation
64
64
2.3.4 Details
66
.3.6 Exercis ..... 68
Control stateme ..... 71
2.4.1 Selection: if- and if-else statements ..... 71
72
2.4.2 Iteration: for statements ..... 72
2.4.3 Blocks and scope
81
2.4.4 Iteration: while statements
83
83
4.5 Iteration do statements
4.5 Iteration do statements
84
84
.4.6 Jump statements
85
88
85
88
4.8 Cquivalence of iteration statements
4.8 Cquivalence of iteration statements ..... 88
2.4.9 Details93
2.4.10 Goals94
2.4.11 Exercises ..... 97
Floating point numb ..... 99
2.5.1 The types float and double ..... 100
102
5.2 Mixed expressions, conversions, and promotions
5.2 Mixed expressions, conversions, and promotions
103
103
.5.3 Explicit conversions
.5.3 Explicit conversions ..... 104
2.5.5 Floating point number systems ..... 105
5.6.6 The IEEE standard 754 ..... 110
2.5.7 Computing with floating point numbers ..... 111
2.5.8 Details. ..... 115
CONTENTS
117
2.5.9 Goals ..... 117
2.5.10 Exercises ..... 118
2.5.11 Challenges ..... 119
26 Arrays and pointers ..... 123
2.6.1 Array types ..... 123
.6.3 Random access to elements ..... 125
2.6.4 Arrays are not self-describing ..... 126
2.6.5 Iteration over a container ..... 127
2.6.6 Pointer types and functionality ..... 128
2.6.7 Array-to-pointer conversion ..... 131
2.6.8 Pointer arithmetic
135
6.6.9 Dynamic memory allocation ..... 135
6.10 Arrays of character ..... 139
6.11 Multidimensional arrays
153
153
2.6.13 Details
2.6.13 Details ..... 155 ..... 155
6.14 Goals ..... 156
2.6.16 Challenge ..... 160
3 Functions ..... 163
3.1 A first C++ function ..... 164
3.1.1 Pre- and postconditions ..... 166
3.1.2 Function definitions ..... 168
3.1.3 Function calls ..... 168
3.1.4 The type void ..... 170
3.1.5 Functions and scope
173
173
1.1. Arrays as function arguments ..... 174
3.1.8 Modularization ..... 177
3.1.9 Using library functions ..... 185
.1.10 Details
18
18
3.1.12 Exercis ..... 188
3.1.13 Challenges ..... 193
3.2 Recursion ..... 197
3.2.1 A warm-u ..... 197
.2.1 A warm-up
.2.1 A warm-up ..... 198
3.2.3 Basic practice
201
3.2.4 Recursion versus iteration ..... 202
3.2.6 Sorting ..... 203
3.2.7 Lindenmayer systems . . . . . . . . . . . . . . . . . . . . . . . . . 211
3.2.8 Details . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 21
3.2.9 Goals . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 21
3.2.10 Exercises . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 218

4 Compound Types 225
4.1 Structs . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 226
4.1.1 Struct definitions. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 228
4.1.2 Structs and scope . . . . . . . . . . . . . . . . . . . . . . . . . . . . 230
4.1.3 Member access . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 230
4.1.4 Initialization and assignment . . . . . . . . . . . . . . . . . . . . . 231
4.1.5 User-defined operators . . . . . . . . . . . . . . . . . . . . . . . . . 232
4.1.6 Details . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 234
4.1.7 Goals . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 236
4.1.8 Exercises . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 237
4.2 Type Variants . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 240
4.2.1 Reference types . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 240
4.2.2 Call by value and call by reference . . . . . . . . . . . . . . . . . . 241
4.2.3 Return by value and return by reference . . . . . . . . . . . . . . . 242
4.2.4 More user-defined operators . . . . . . . . . . . . . . . . . . . . . . 243
4.2.5 Const-types . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 24
4.2.6 What exactly is constant? . . . . . . . . . . . . . . . . . . . . . . . 249
4.2.7 Const-references . . . . . . . . . . . . . . . . . . . . . . . . . . . . 250
4.2.8 Const-types as return types. . . . . . . . . . . . . . . . . . . . . . 251
4.2.9 When to use const? . . . . . . . . . . . . . . . . . . . . . . . . . . 252
4.2.10 Goals . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 253
4.2.11 Exercises . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 253
4.2.12 Challenges . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 256

4.3.1 Encapsulation . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 25
4.3.2 Public and private . . . . . . . . . . . . . . . . . . . . . . . . . . . 260
4.3.3 Member functions . . . . . . . . . . . . . . . . . . . . . . . . . . . 26
4.3.4 Constructors . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 263
4.3.5 Default constructor . . . . . . . . . . . . . . . . . . . . . . . . . . . 264
4.3.6 User-defined conversions . . . . . . . . . . . . . . . . . . . . . . . . 265
4.3.7 Member operators . . . . . . . . . . . . . . . . . . . . . . . . . . . 266
4.3.8 Nested types . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 267
4.3.9 Class definitions . . . . . . . . . . . . . . . . . . . . . . . . . . . . 268
4.3.10 Random numbers . . . . . . . . . . . . . . . . . . . . . . . . . . . . 269
4.3.11 Details . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 27
4.3.12 Goals . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 27
4.3.13 Exercises . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 277
A C++ Operators 281
Index 284
B Solutions 297
